

Expected Outcomes

- Improvements in service delivery for identifying and managing infants with NOWS/NAS.
- Improvements in perinatal measures related to identification and management of infants with NOWS/NAS.

Measures (P = Process; B = Balancing; O = Outcome)

- Number of PDSA cycles (P)
- Number/percent of infants at risk for NOWS/NAS evaluated with validated tool (O)
- Number/percent of infants treated using standardized protocols (O)
- Number of infants with NOWS/NAS (B)
- Number of infants transferred/transported for higher level of care (B)
- Duration of treatment for NOWS/NAS (O)
- Duration of pharmacological treatment for NOWS/NAS (O)
- Length of hospitalization (O)
- Number/percent of families expressing satisfaction (P)
- Number of providers expressing satisfaction (P)
